

This is Our Isagenix Weight Loss Story . . . Over The Road Truck Driver Loses “Trucker Gut”

We have been over the road truck drivers for about 7 years. We don't have much of a chance to exercise on the road and had struggled with our weight for many years.

We began our Isagenix program on October 15, 2007. On our first Cleanse Program - Lisa released 10 pounds and Scott released 11 pounds – and both of us had tons of energy. We could hardly believe the amazing results ! We continued on and in a short period of time, Lisa released 17 pounds and Scott released 23 pounds and we both felt so happy and energized.

Since starting the program, Lisa went from a size 12 to a size 4 and released 28 lbs. total. Scott has gone from a tight size 36 to a loose 34 and has lost what was previously referred to as his 'trucker gut'. He has released over 30 pounds so far !

Amazingly, we did this all without exercise ! We also have more energy than ever before, even though we have given up coffee. We are so excited and we love telling all of our trucker friends about Isagenix. Now, our product is paying for itself.

Thank you, Teresa Schneider, for introducing us to Isagenix !

Scott and Lisa Ketelsen,
Tacoma, WA

Weight-loss results may vary. In a recent study, participants averaged a weight loss of 7 pounds at the completion of their first Isagenix 9 Day Program. Always consult your physician before making any dietary changes or starting any nutrition, weight or exercise program.
